Quick Tips

Basic Search

Just enter your search term and press **Start**. An "All-Smart Search" is launched, retrieving results ranked by the significance of the field in which your term is found (e.g. subject, title, abstract, author). On databases that feature the full text of articles, you can choose to search the articles for any mention of your term in any context.

Advanced Search

Offers a wide range of options for precision searching. Specify as many or as few parameters as you wish. You don't have to fill in every line.

Browse

Lets you browse for your search item in an alphabetized list of terms covered by the database. Handy if you aren't sure of the spelling, and points you to important subtopics.

Launch a search of any topic by clicking the link.

Use the checkboxes to select topics to search in combination.

Thesaurus

Finds related subjects so you can easily narrow or broaden your search.

Brief Display

To view complete bibliographic information for a single article: Click the title.

To gather selected entries for later viewing: Use the checkboxes, and click **Get Marked** when you're done.

To search related subjects: Click any of the suggestions here.

To display the full text of an article: Click the **Full Text HTML** link.

To display actual page images of an article: Click the **Full Text PDF** link.

To check for the full text on other linked databases or the Internet: Click the **WilsonLink** icon next to the entry.

To view just full text, PDF page images or peer-reviewed articles: Click the appropriate tab.

To toggle to full display, click Full Display or click on the title of any record.

To see more results: Click the subsequent page number.

Title: **How Media Ecologies Can Address Diverse Student Needs.** *College Teaching* v. 57 no. 1 (Winter 2009) p. 56-63

Personal Author: **Clancy, Charles J.; Eastburn, Dawn M.; Bruce, Barbara C.**

Journal Name: **College Teaching**

Source: **College Teaching** v. 57 no. 1 (Winter 2009) p. 56-63

Publication Year: 2009

Abstract: Post-secondary education sees an increasing variety of **instructional media** and an increasing diversity among learners. The goal of this study was to ascertain whether students of different learning styles, majors, and genders benefited from particular **instructional media**. Students completed a learning styles inventory and a survey of perceived usefulness of each **instructional medium**. Qualitative information was collected in student focus groups. All students perceived some of the same **instructional media** as useful and all valued a mix of **media**. A rich ecology of **media** appears to enhance student learning. Reprinted by permission of the publisher.

Subject(s): **Colleges and universities/Teaching methods/Evaluation; Classroom style/delivery; Audiovisual materials; Cooperative study**
